

PIPEJACKING CASE HISTORY

Pipejacking from Perco

Client: Bam Nuttall
Project: Kings Cross Pipejacking
Sub-Contractor: Perco Engineering Services Ltd.

The pipe jacking team from Perco Perco management. Engineering delivered yet another successful project at Kings Cross.

The client had been tasked with installing three pipes under the grade one listed archway.

To avoid any potential risk to the archway using traditional open cut methods, the client employed the Trenchless Services of Perco Engineering to deliver the project. 'The project ran like a dream' says

Perco management. 'Obviously the listed nature of the archway presented the client with a challenge, that's when the trenchless services of Perco come into their own.'

Louis Koch—Senior Quantity Surveyor at BAM Nuttall Ltd said "I have made use of Perco's services at a complex job in Kings Cross and the work was done to the highest standard!"
